BRIEF TO THE STANDING COMMITTEE ON PUBLIC SAFETY
AND NATIONAL SECURITY
Bill C-19: An Act to amend the Criminal Code and the Firearms Act
(Ending the Long-Gun Registry Act)

Summary

The Canadian Federation of University Women (CFUW) calls on Committee members to oppose Bill C-19. This Bill, if passed, would eliminate a valuable public safety tool that protects women from gun related violence. At the very least, sections 29 (1), (2) and (3), which call for the destruction of the long gun registry records should be removed. Furthermore, section 23 (1) should be amended to require that a transferor verify the validity of the transferee's Firearms Licence with the Canada Firearms Centre, and obtains a reference number for the inquiry.

We thank the committee for this opportunity to present on behalf of our close to 10,000 members across Canada.

CFUW members are aware that long guns are a threat to women's safety in violent situations and that unregistered guns pose a risk to front-line workers, such as police and other first responders.

Gun Control has Improved Women's Safety:

When assessing this bill, the committee must take into consideration the fact that women are disproportionately affected by violence in relationships. Women are several times more likely to experience such violence, especially choking, threats with a weapon and sexual assault.¹ The Homicide Survey by Statistics Canada and the Canadian Centre for Justice Statistics shows that there were 581 female spousal homicide victims from 2000 to 2009 inclusive: 3.7 times the total number of male spousal homicide victims (157), for 79% of the total and an average of 60 a year.²

Even now, about 25% of all the female spousal victims since 2000 were killed by firearms,³ but that is down substantially from previous decades – 40% between 1978 to 1997.⁴ Since 1974, relatively few firearms-related domestic homicides have been perpetrated by means of

³ *Ibid.*, 149 of the 581 female spousal victims in Canada between 2000 and 2009 were shot to death (25.6%).

⁴ Statistics Canada, *Family Violence in Canada: A Statistical Profile*, 1999, Table 5.3, www.statcan.gc.ca/pub/85-224-x/85-224-x1999000-eng.pdf

handguns. Long guns, however, have been the weapon of choice in far more crimes of passion and domestic homicides: ranging from a high of four per million spouses in 1974 to 0.5 per million spouses in 2007 (see Figure):

Rate of spousal homicides involving firearms in Canada 1974-2007, by major type⁵

The 2009 Statistics Canada *Family Violence Report* also shows that firearm-related spousal homicide has decreased **three-fold** over the past decade, from 1.7 per million spouses in 1996 to 0.5 per million spouses in 2007; in absolute terms, there were **27** firearm-related spousal homicides in 1996 compared to **9** in 2007.⁶ Thanks to the implementation of stronger gun control, including the long gun registry, the spousal homicide rate has dropped to the lowest it's been in 30 years. Further, in the past, long guns were used in about 60 percent of *all* homicides (not just domestic),⁷ but with the advent of a number of gun control regulations in the 1990s, that dropped to 36.5 percent in the 1990s, to 22.2 percent in the 2000s – almost a third of what it used to be.⁸

Dismantling the gun registry will compromise women's *Charter* rights

Section 7 of the *Canadian Charter of Rights and Freedoms* safeguards the fundamental right of women in Canada to life, liberty and security of the person, and Section 15 of the *Charter* guarantees women the right to equal protection and equal benefit of the law. In affirming the constitutional validity of federal gun control legislation in *Reference re Firearms Act (Can.)*, [2000] 1 S.C.R. 783, the Supreme Court of Canada concluded that:

“The licensing provisions require everyone who possesses a gun to be licensed; the registration provisions require all guns to be registered. These portions of the *Firearms Act* are both tightly linked to Parliament's goal of promoting safety by reducing the misuse of any and all firearms. Both portions are integral and necessary to the operation of the scheme.”

The *Firearms Act* was adopted by Parliament, following the 1989 Montreal Massacre, as one means of addressing the systemic problem of violence against women in Canada. As the statistics set out above demonstrate, women in Canada remain disproportionately vulnerable to firearm-related spousal violence and to firearm-related spousal homicide. Failure to take into account the gendered impact of *Bill C-19* and the dismantling the gun registry reflects profound disregard for women's rights to life, liberty and security of the person, and equality, and amounts to a clear violation of women's *Charter* rights.

The Registry provides an invaluable tool for police and first responders:

Police officers and first responders use the Gun Registry. In the 2008 Commissioner of Firearms Report, the RCMP states that the Registry provides police officers with up-to-date firearms information and warns them when firearms may be present at a location.⁹

Between January and September 2011, the Canadian Firearms Registry On-line (which includes both long guns and other types of guns such as handguns, all integrated together) was consulted over three million times by police.¹⁰ This information makes police officers, social workers, and other first responders' work safer, do their job better and provide safer communities for Canadians.

Past-RCMP Commissioner William J.S. Elliott has said; “On an international level, the CFP [the RCMP Canadian Firearms Program, of which the Registry is a facet] now sets a standard ...and other countries have chosen to emulate it.”¹¹

Destruction of the long gun registry records will compromise the ability of provinces, territories and municipalities to protect public safety:

Public Safety is a shared responsibility between the federal, provincial, territorial and municipal governments.¹² Thanks to the national long gun registry, other levels of government have been able to better protect the public safety of their residents. The provinces and territories have also contributed to building the long gun registry.

The data collected for the long gun registry could still be useful as an investigative tool for police officers to trace firearms recovered from crime scenes or seized from suspected criminals, including registered guns that were stolen from the original owners. The justice system will also be deprived of its usefulness and cost-effectiveness in prosecuting gun-related crime involving non-restricted weapons, by proving that the guns belonged to the accused or someone else implicated in a crime, or that they belonged to someone else and the accused were not permitted to use them. Between 2003 and 2008, for example, the gun registry provided nearly 18,000 affidavits to court trials to support the prosecution of gun-related crime.¹³

Further, if the national registry is abolished, provincial and territorial governments could significantly benefit from access to the records relevant to their respective territories, as they may wish to establish their own long gun registries in the future. Destroying the long gun registry records is both unnecessary and wasteful.

Verification of Licence Validity

By removing the requirement to verify the validity of Firearms Licences upon transfer of non-restricted firearms, Bill C-19 will be further putting public safety at risk. The 1998 coroner's inquest into the killing of Arlene May, who was shot and killed with a legally acquired rifle, found this to be a major flaw in Canada's gun controls at that time.¹⁴

While May's former lover's gun licence was cancelled following a prohibition order, it was not removed from his possession. Without mandatory firearms licence checks, this meant that he was still able to purchase a firearm legally with his cancelled licence.¹⁵ Verifying the validity of Firearms Licences upon transfer of non-restricted firearms is essential to ensure that individuals under prohibition orders, and individuals whose licence has been revoked, do not have the ability to purchase firearms. Further, as with other types of identification cards, Firearms Licences can be counterfeited and removing these safety checks will make it possible for someone with a fake licence to acquire legal firearms.

Recommendations

Based on the evidence of the long gun registry's efficacy for protecting the safety of women, police officers, social workers and other first responders, CFUW recommends that the Standing Committee on Public Safety and National Security oppose Bill C-19.

In the event that members of this Committee support Bill C-19, we strongly recommend that the Committee amend the Bill, by:

- a) removing sections 29 (1), (2), and (3);
- b) adding to section 23 (1) the mandatory requirement that a transferor verify the validity of the transferee's Firearms Licence with the Canada Firearms Centre and obtain a reference number for the inquiry.

CFUW is a non-partisan, voluntary, self-funded organization of close to 10,000 women university graduates, students and Associate Members in 112 Clubs across Canada that works to improve the status of women and human rights, education, social, justice, and peace. CFUW holds special consultative status with the United Nations (ECOSOC) Commission on the Status of Women and belongs to the Education Sector of the Canadian Commission to UNESCO. CFUW is the largest of the 79 affiliates of the International Federation of University Women (IFUW).
